EXPERIENCE

Senior Software Engineer

04/22 – Present

Alteryx

Remote

- Partnered with product managers, designers, and engineers to deliver customer-facing applications using React, TypeScript, and Python, contributing to products generating \$1.8M, \$1.4M, and \$6.5M ARR
- Led engineering initiatives including shared component libraries, feature flags, CI/CD pipelines, linting standards, and automated testing practices
- Designed and implemented rate limiting and quota systems for critical services and AI endpoints, improving reliability and protecting expensive resources
- Integrated third-party AI services and delivered customer-facing chat experiences built on an internal AI platform leveraging RAG, embeddings, vector search, tool calling, and specialized agents

Cloud Services Developer (SWE II)

04/21 – 04/22

HP

Remote

- Assumed ownership of a distributed test automation platform built with Django, Celery, RabbitMQ, PostgreSQL, Docker, and AWS, supporting validation workflows across HP's printer ecosystem
- Reduced average API latency by 20% through backend optimizations and performance improvements while supporting large asynchronous workloads via distributed task processing
- Introduced a React dashboard that replaced manual Postman and CLI workflows for test engineers

Software Engineering Intern

06/20 – 03/21

Air-Weigh

Eugene, OR

- Prototyped a microservices-based administrative platform with Flask and PostgreSQL, later delivering a production implementation using Django REST Framework, React, AWS Cognito, and MySQL
- Maintained and enhanced a customer-facing fleet management platform built with Spring Boot, MySQL, Apache Tomcat, and AWS

Software Engineering Intern

06/19 – 09/19

TDS Telecom

Bend, OR

- Developed ETL pipelines in Python and SQL to support network diagnostics and capacity reporting, improving data availability for analytics workflows
- Optimized automated data processing systems and applied Test-Driven Development (TDD), reducing server load and improving performance

EDUCATION

University of Oregon | Bachelor of Science with Honors

09/16 – 03/21

Major in *Computer Science*

Major in *Spatial Data Science*

PORTFOLIO & OPEN-SOURCE PROJECTS

validate-env-vars

npmjs.com/package/validate-env-vars

- Lightweight utility for validating environment variables against a Zod schema for local development and CI/CD
- Published on NPM, peaking at 40,000 monthly downloads

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, Java, SQL

Frameworks: React, Django, FastAPI, Flask, Spring Boot, JUCE

Infra & Tools: Docker, AWS, GitLab CI, Azure DevOps, Nginx, Git, Traefik, Postman, OpenCode, Codex
